

## Introductory Flight

An introductory flight lesson is the perfect way to experience the thrill of flying. You won't just be along for the ride – a professional Certified Flight Instructor (CFI) will help you take control of the airplane and practice the basics of flight – climbs, turns, and descents.

The one hour introductory flight lesson includes:

Ground instruction

A flight from the Private Pilot Course – you will take control and experience piloting

A San Francisco Aeronautical chart – a pilot's map of the Bay Area

Pilot Logbook – to record your first of many flight hours

First Lesson Certificate and Photograph – to remember your first step to becoming a pilot

Flight Training Magazine subscription – to keep you updated on all the latest training topics

All of this for a low introductory rate based on your airplane selection:

REMOS Light Sport Aircraft – \$129.00

Cessna 172SP – \$179.00 (Traditional or G1000 cockpit)
